All our products can be found on our e-shop at www.herbarius.sk

We grow medicinal herbs, we pick wild plants, we purchase foreign herbs, and we prepare for you diet supplements (tinctures, syrups), herbal ointments, gels, oils and also complementary tea leaves.

Herbal Ointments, Oils and Gels

(cosmetic products with beneficial health effects)

Herbal ointments are prepared using fresh medicinal plants.

The ointment base is prepared from quality pharmaceutical materials, which guarantees required quality and durability when properly stored.

Herbal ointments are appropriately complemented with essential oils, or other important components. Herbal ointments are applied to clean and intact skin several times a day if necessary, using a thin layer in order not to stem the pores. An ointment must not be applied to an open wound or used in case of hypersensitivity to one or more of the used ingredients.

For preparation of herbal gels, we use a quality gel base. In this base, concentrated plant extracts prepared in a careful manner (through inspissations at low pressure) are dissolved. Gels are usually complemented with natural essential oils from plants and other agents. Gels are applied several times a day if necessary. Absorption is ensured through gentle movements. Gels must not be applied to an open wound.

To prepare herbal oils, we use quality olive oil, in which parts of plants are percolated. Oils are applied in appropriate quantity several times a day if necessary. The products ought to be stored in cold and dry places at room temperature of a maximum of 24 degrees C, they ought to be shielded from sunlight and protected from freezing. It is necessary to consume the products before the recommended consumption date.

All used containers are trademarked.

The products were not tested on animals. The products were dermatologically tested.

Further information on use and contents can be found on our website.

**Mullein
(Ointment for Mountains)**

catalogue number: **424**
Used mostly for treatment of skin
in case of frostbite, knee ulcers,
tired limbs and coronary problems
